Trace-li · Synthetic award packet (rehearsal)

Country office award file — synthetic rehearsal (Sudan shape)

SYNTHETIC REHEARSAL. NOT a UNFPA country office file. NOT a customer upload. Public-case rehearsal mapping UNFPA OAIS audit report IA/2025-29 (cited by number only) onto a Field Registry freeze under pack unfpa. All partner, staff and supplier labels are placeholders. No real implementing partner, staff member or bid price appears. Cite the OAIS report on the Case Card; this packet is what gets uploaded to the desk.

---

1. Cover

Award reference	UNFPA-IA-2025-29-SUDAN-REHEARSAL
Donor / framework	UNFPA · pack unfpa, UNFPA OAIS-shaped award desk v0, version 2026.1 (desk selection)
Office (shape only)	Country office, Sudan shape — synthetic
Implementing partner	NGO Partner A (synthetic placeholder)
Supplier	Supplier B (synthetic placeholder)
Office rating (public audit)	Partially Satisfactory with Major Improvement Needed — as stated in IA/2025-29 ¶5
Packet purpose	Founder Freeze #3 for Case Card unfpa-ia-2025-29-sudan

2. Implementing partner selection and threshold approver (gap intended)

IP selection path: non-competitive. NGO Partner A was engaged non-competitively in exceptional humanitarian circumstances. **Approval on file:** Representative approval only (Head of Office).

Cumulative workplan amount for the programme cycle: above US$0.5 million (exceeds the US$0.5 million cumulative threshold). At this level the approver must be the Regional Director.

Approver must match the cumulative workplan threshold: not met on this file. No Regional Director approval is on file. The Representative approval is the only approval recorded.

MISSING: ip.threshold_approver — Regional Director approval above the US$0.5 million cumulative workplan threshold.

3. RFQ solicitation — sample requirement: visibility items (gap intended)

Solicitation method: request for quotation (RFQ). **Requirement:** visibility items for the programme (one sample requirement; quantities and amounts withheld on purpose — do not invent bid prices). **RFQ evaluation criteria in the solicitation:** none listed. The RFQ document sent to suppliers states the requirement and the closing date only; it does not state how quotations will be evaluated.

Technical evaluation (as filed): the criteria column is filled; the individual score cells are blank.

Evaluation criterion	Supplier B	Supplier C	Supplier D
Compliance with specification			
Delivery lead time			
Past performance			
Individual score recorded	blank	blank	blank

RFQ evaluation criteria and individual scores: not on file. The solicitation has no evaluation criteria and the evaluation records no individual scores, so the file cannot show a scored comparison.

MISSING: procurement.rfq_criteria_and_scores — RFQ evaluation criteria and individual scores.

4. Delivery, purchase order and receiving (gap intended)

Goods status: the visibility items are recorded as received at the country office store. **Binding purchase order or contract before delivery:** none. No approved purchase order was issued before the goods were received, and no signed contract is on file.

Receiving and inspection report (RIR): no policy-compliant RIR is on file. A one-line store note says the goods arrived. It uses a non-standard template, is not signed by a receiving and inspection officer, and does not certify acceptance or rejection of the goods.

MISSING: procurement.po_or_contract — approved purchase order. MISSING: procurement.rir — policy-compliant receiving and inspection report certifying acceptance or rejection.

Note: the RIR is completed after delivery, so the pack treats it as a warning. It is still named on the file.

5. Explicit Field Registry cues for extraction

For Trace-li judgment under pack **unfpa** (version 2026.1). Stated plainly so an extractor can pick them up. Values as they stand on this packet:

Field key	Pack label	State on this packet
audit.office_rating	Office rating (public audit context)	present: Partially Satisfactory with Major Improvement Needed (IA/2025-29 ¶5)
ip.threshold_approver	Approver must match the cumulative workplan threshold	missing: Regional Director approval above US$0.5 million not on file
procurement.rfq_criteria_and_scores	RFQ evaluation criteria and individual scores required	missing: no criteria in RFQ; individual scores blank
procurement.po_or_contract	Binding purchase order or contract required before delivery	missing: no approved purchase order
procurement.rir	Receiving and inspection report named on the file	missing: no policy-compliant RIR; acceptance or rejection not certified

This packet does not carry any other UNFPA pack evidence. It is a finding-slice rehearsal of IA/2025-29, not a full pack claim for a live award.

6. Redaction / claim boundary

This packet withholds implementing partner names, staff names, supplier names, bid prices, quotation amounts and evaluation sheets beyond the audit's own summary. It does not claim Trace-li prevented the OAIS finding, certify the country office, or imply that UNFPA is a customer or endorser. An audit is not a criminal verdict; an agreed recommendation is not a completed action. Primary cite remains UNFPA OAIS IA/2025-29 (24 December 2025).
